

HIMANSHU

+91 7015708154 | dahiyahimanshu80@gmail.com | <https://www.linkedin.com/in/himanshuakabored/>

Full-Stack Developer and UI/UX Designer with experience building modern web applications from design to deployment. Proficient in React, Next.js, JavaScript, Node.js, Express.js, MongoDB, Tailwind CSS, and Figma. Experienced in developing responsive user interfaces, REST APIs, database-driven applications, and AI-powered solutions. Passionate about creating intuitive digital experiences while building scalable and efficient web products.

Education

Deenbandhu Chhotu Ram University of Science and Technology

Sept. 2024 – June 2028

B.Tech in Electronics and Communication — CGPA: 7

Murthal, Sonipat

Indian Modern Senior Secondary School

April 2023

12th — Grade: 86%

Gohana, Sonipat

Technical Skills

Languages: Java, C, C++

Design: Figma, Framer, AdobeXD

Frontend: Next.js, React.js, JavaScript, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Tools: Git, Github, Postman, MCP

AI/Tools: Gemini API, Github API, Huggingface, Stitch

Projects

PAW | <https://github.com/Bored008/Paw>

March 2026

- A modern pet adoption platform built to help people discover, connect with, and adopt pets with ease.
- Paw is a beautifully designed web application that simplifies the pet adoption journey for both adopters and rescue organizations. The platform provides an interactive experience where users can explore available pets, learn about pet care, and connect directly with adoption centers or pet owners.
- TechStack: React.js, Node.js, Express.js, MongoDB, TailwindCSS, LocalStorage API, Figma(For Design)

DocDesign | <https://github.com/Bored008/DocDesign>

December 2025

- Built an AI-assisted documentation and UI content generation tool that converts structured prompts into clean, developer-ready documentation layouts. Developed the interface using React, JavaScript, HTML, CSS, and TailwindCSS, Figma, Node.js, Express.js, MongoDB, Generativeai enabling users to quickly generate organized documentation sections and reusable content blocks for projects and portfolios.

Youtube Extension | <https://github.com/Bored008/youtube-extension>

April 2025

- Developed a Chrome Extension using HTML, CSS, JavaScript, Node.js, and Express.js that enables users to download YouTube videos in their preferred quality. Implemented a custom backend to handle video processing, download requests, and communication between the extension and server. Added support for custom video trimming, allowing users to specify start and end timestamps and download only the required portion of a video. Worked with backend APIs, media processing, browser extension development, and client-server architecture to build a complete end-to-end application.

Github Profile Analyzer | <https://github.com/Bored008/github-profile-analyzer>

May 2026

- Developed a web application using Next.js, React, TypeScript, Tailwind CSS, and GitHub API to analyze GitHub profiles and provide detailed insights into a developer's activity. Implemented features such as repository statistics, contribution analysis, language distribution, profile metrics, and developer activity visualization. Integrated GitHub APIs to fetch real-time user data and transformed raw repository information into meaningful analytics through interactive dashboards and charts. Focused on API integration, data processing, responsive UI design, and performance optimization to create a tool that helps developers better understand and showcase their GitHub presence.

Extracurricular

- Core Team Member of the Open Developers Community (ODC), DCRUST
- Active participant in multiple national-level hackathons
